

LA SALUTE INCONTRA LA BELLEZZA

A Milano arriva la clinica **Asisa Care** che rivoluziona l'approccio alla sanità privata. Esclusività ed eccellenza alla portata di tutti

LA STRUTTURA

Una clinica specializzata nel benessere a 360 gradi che opera attraverso piani di salute completi e adatti a ogni esigenza. Cinque le principali aree di intervento: Medicina Estetica, Medicina Ginecologica, Medicina Dentale, Fisioterapia, Osteopatia e Nutrizione. L'obiettivo della clinica Asisa Care di Milano - il primo centro in Italia della società spagnola leader nella sanità privata - è la prevenzione e il miglioramento del benessere fisico e psicologico dei pazienti grazie a qualità, innovazione e tecnologie all'avanguardia.

Clinica Asisa Care Via Vincenzo Monti, 42 - Milano Tel. 02.48.11.822 www.asisa-care.com

HEALTH MEETS BEAUTY

The Asisa Care clinic arrives in Milan which revolutionizes the approach to private healthcare. Exclusivity and excellence affordable for everyone

A team of highly skilled doctors with the best selection of cutting-edge technologies, are the assets of the innovative multi-specialized center in Milan. Beauty treatments, increasingly in demand, are in need of security and professionalism. Thanks to the combined approach of innovative machinery and complementary treatments doctors of the Asisa Care clinic can intervene in a timely manner on the face and body blemishes, giving patients confidence and a healthy look. Beauty is first of all synonym of health: finding a solution for acne, stretch marks or skin blemishes through ad hoc protocols, means finding the balance of the skin, using hyaluronic acid in combination with bio-stimulation means rebuilding and reorganizing the structure of the skin to keep it young and counteract wrinkles but especially making it healthy and resistant, restoring elasticity and firmness. You can find the latest treatments, such as traction threads for a more defined and relaxed face, and the latest machinery to take care of the body as Bodyka, which counteracts cellulite and localized adiposity through sonication and endodermal technology, for a deep drainage that reactivates tissues and free from excess fat. Another example of technological excellences available at the Asisa Care Clinic is OXYS. It is a device capable of generating a high concentration of hyperbaric oxygen by obtaining and filtering it from the surrounding air. Oxygen therapy cleanses the skin and in particular it gets specific products one level deeper, depending on the needs to rejuvenate, moisturize, brighten or energize the skin. Before embarking on any treatment, a deep examination will allow the medical team to study the most suitable path to undertake.

THE STRUCTURE

A clinic specializing in wellness to 360 degrees which operates through comprehensive health plans and suited to your needs. Five major areas of practice: Aesthetic Medicine, Gynecological Medicine, Dental Medicine, Physiotherapy, Osteopathy and Nutrition. The aim of the Asisa Care clinic of Milan - the first centre in Italy of the Spanish company leader in private health care - is prevention and improving the physical and psychological wellbeing of its patients through quality, innovation and cutting edge technologies.
