Lifted gluteus, the last women's wish

Star gluteus lifting effect

BODYKA PLUS OF NOVACLINICAL.

An alternative to surgical liposuction to treat localized fat.

It is based on low frequency sonication of ultrasonic waves (ultrasonic acoustic waves produce lysis, that is the break of adipocyte membranes) and it is combined with the action of a specific handle of the sub-dermal vacuum, performing the massage of the connective tissue and the lymphatic drainage procedures. It gives a natural lifting effect.
